

Juan Ernesto Turcios

RÉSUMÉ · AI OPERATIONS, SOLUTIONS AND INTERNAL TOOLING

i build the systems a business actually runs on

Founder of Kova. USC film. I design the brand, sell the product, and write the software underneath it, and I'm looking for work where that last part is the job.

01 — STRENGTHS

three things i'm good at

01 automating real operations

AI agents wired into six live business systems — Shopify, Xero, Square, Notion, Gmail and Cloudflare — with tested safety hooks that stop a bad deploy reaching a live storefront. Built for a business where a mistake costs money, not a demo.

02 selling face to face

Nearly 100 pop-ups. A stranger gives you ten seconds and a reason to say no. 1,030 units sold, a wholesale account opened from cold outreach, and a price ladder I still defend.

03 making it look like something

A USC film degree and five years of production, plus brand identity work for two ventures. I can shoot it, cut it, design it, and explain why it's laid out that way.

kova-ops

THE AUTOMATION LAYER

Two safety hooks that stop an AI agent publishing to a live storefront or running destructive git, with 73 passing tests. Traffic-aware delivery routing with a binary search for the latest safe departure. I found three production bugs in the hooks by probing them with crafted payloads that code review had passed.

Kova

FRESH PROTEIN ICE CREAM

Founded August 2025. 30g protein and 200 calories in a single-serve cup. I make the product, design the brand, build the Shopify storefront in Liquid, run the deliveries, and keep the books. Nearly 100 pop-ups across LA gyms and studios.

STUDIO WORK

Web, content and automation builds for small businesses, plus a second brand serving architecture and design firms on a shared engine. Sites on Eleventy and Cloudflare Pages, self-hosted type, structured data, and a pricing model benchmarked against the market rather than my old rates.

03 — HISTORY

before this

2023 — 2025	York Healthcare and Wellness Center — Activities Assistant. Daily programming and one-to-one care in a skilled nursing facility. User research with about 100 residents that fed a real product design.
2022 — 2024	Freelance videographer and photographer — Latino music events across LA venues. Deliverables to clients within 72 hours.
2022	Winterlight Pictures — Creative Development Intern. Built an Airtable database tracking trending creators; wrote script coverage used in development decisions.
2021 — 2023	USC School of Cinematic Arts — Administrative Assistant. Led admissions information sessions and campus tours for groups of 20+ families.
2021 — 2024	¿Y La Novia? by Mykael — Creative Director. Eight tracks produced; pitched Chartmetric and SubmitHub curators to grow streaming traffic.
2020	"Inherited" — Writer, Co-Director, Co-Producer and Co-Editor. An 18-person crew and a \$2,000 budget, at twenty.
2023	University of Southern California — B.A., Cinema and Media Studies. Film coursework at Syracuse University, 2018–2020.

04 — NEXT

AI operations, solutions, or internal tooling — work where the job is turning a messy process into a system that holds. Remote, or close to Los Angeles. Fluent in English and Spanish.
